Passion. Precision. Purpose.

At Renova 360, we bring construction, renovation and fit-out, security, facility management, and lift services together under one framework.

Our methodical approach ensures that technical precision aligns with the overall project vision, creating built environments that are cohesive and expertly executed.

Each project follows a consistent process built on clarity, coordination, and professional standards.

Renova 360 Contracting (formerly Proguard) operates under Abdulla Al Arif Holding, delivering integrated solutions across multiple sectors.

We specialize in small-to medium-scale construction, renovation and fit-out works, facility management, security services and lift services in the UAE.

Our focus is on practical, high-quality solutions tailored to each client. With a skilled team and commitment to excellence, we ensure every project — from concept to completion — is executed with precision and reliability. We build long-term partnerships based on trust, transparency, and consistent performance.

Guided by innovation and supported by Abdulla Al Arif Holding, Renova 360 contributes to the UAE's development with integrity and purpose.

Introduction

Abdulla Al Arif Holding was established in Dubai in 1986 and has since built a diversified portfolio spanning key industries in the UAE and internationally.

Over nearly four decades, this growth has created a resilient group structure that oversees operations, aligns resources and supports strategic expansion across its ventures. The group operates through five specialised divisions: Construction, Manufacturing, Sports and Lifestyle (Spadrec), Services and Transportation, supported by more than 20 operating companies.

Powered by a 7,000-strong workforce, AAAI maintains a long-term focus on sustainable operations while continuing to strengthen its presence in regional and global markets.

About the Group

40 Years of Excellence

Chairman's Message

“

The foundation of trust built over years in security and facility management remains vital. But our mandate has expanded significantly to encompass the entire building lifecycle.

”

Today marks an important milestone for Abdulla Al Arif Holding with the launch of Renova 360, the evolved identity of ProGuard. This transformation goes beyond a name change and reflects a strategic shift from specialized services to a fully integrated property lifecycle partner. Building on ProGuard's trusted foundation in security and facility management, Renova 360 now brings together construction, renovation, fit-out and ongoing operations under one platform. By integrating these capabilities, we offer a single, accountable partner focused on delivering efficiency, consistency and long-term asset value across every stage of a property's lifecycle.

Abdulla Al Arif

Chairman & Founder

Our Group Companies

Abdulla Al Arif Holding comprises a diverse range of companies operating across various sectors in the UAE, including Naresco Contracting LLC, Mudin Al Emarate Building Contracting LLC, Modern Coat Interiors LLC, Al Madaen Electromechanical Works Co. and Al Shandagha Wood Industries LLC along with other specialized subsidiaries. Together, these companies deliver integrated solutions in construction, interiors, electromechanical works, manufacturing, facility services and other services—collectively reflecting the Group's commitment to quality, innovation and sustainable growth.

Their strategic vision, commitment to innovation and dedication to collaboration ensure the company continues to grow and deliver value. This extensive expertise and deep industry insight enable Renova 360 to navigate evolving markets while upholding the values and standards that define the company, fostering excellence, innovation and sustainable progress

Executive Leadership

We deliver comprehensive solutions across construction, renovation, operations and specialized services for commercial, residential, retail, institutional and industrial projects.

Our services cover complete construction works, turnkey fit-outs, end-to-end facilities management, professional security services, structural repairs and concrete restoration as well as specialized support such as steel fabrication, lift servicing and parking structures — all designed to meet client needs with efficiency and reliability.

Our integrated **in-house service model** ensures faster response, operational transparency, cost efficiency, and consistent service delivery.

Our Services

- Construction Works
- Renovation & Fit-Out
- Facility Management
- Security Services
- Pest Control & Anti-Termite
- Lift Installation & Maintenance
- Structural Repairs & Concrete Restoration
- Other Services: Steel Fabrication & Installation, Parking Sheds & Canopies

We specialize in small- to medium-scale construction projects, delivering end-to-end solutions for commercial, residential and institutional developments with a focus on quality, safety and timely completion.

Construction Services Include:

- Site preparation and earthworks
- Structural works (concrete, steel, masonry)
- Roofing and waterproofing systems.
- External façade works (stone, ACP, cladding, glazing)
- Internal partitions and ceilings, flooring, wall finishes and painting
- Flooring, wall finishes and painting
- Mechanical, electrical, plumbing (MEP), firefighting and ELV systems
- Testing, commissioning and handover
- Landscaping, hardscaping and external works

Construction Works

The scope encompasses comprehensive hospital construction, starting with site preparation and enabling works, followed by structural and concrete works, blockwork, masonry and architectural finishes including internal fit-out. All essential building systems are covered, such as waterproofing, thermal insulation, roofing, aluminum and glazing, metal and joinery works, painting, HVAC, plumbing, electrical, low-voltage, fire alarm, firefighting and medical gas installations. Specialized hospital areas like operating theatres, labs and isolation rooms are delivered with precision, alongside vertical transportation, external works, landscaping and signage. The project concludes with thorough testing, commissioning and handover, underpinned by strict health, safety and environmental management and continuous coordination with consultants, authorities and hospital operators.

Dubai London Hospital

Location
Umm Suquiem 2, Dubai

The project covers complete construction works, beginning with site preparation and earthworks followed by structural and concrete works, blockwork, masonry, roofing and waterproofing. External façades, cladding, aluminum and glazing as well as internal partitions, ceilings, flooring, wall finishes, painting, joinery and carpentry are included. All building systems are addressed, including mechanical (HVAC), plumbing, electrical, lighting, fire alarm, firefighting and ELV systems such as CCTV, access control and data networks. The scope also incorporates external works, landscaping, playground equipment, signage and decorative elements, concluding with testing, commissioning and handover, while ensuring strict health, safety and environmental management and ongoing coordination with consultants, suppliers and client representatives.

Ladybird Nursery

Location
Al Barsha 3, Dubai

The scope includes comprehensive gym fit-out and refurbishment works, starting with site preparation, demolition and structural modifications followed by blockwork, internal partitions, roofing and waterproofing. Architectural finishes, flooring, wall and ceiling finishes, aluminum, glass, metal, joinery and carpentry installations are all covered. Building systems such as HVAC for ventilation and cooling, plumbing and drainage, electrical and lighting, fire alarm, firefighting, ELV, and sound systems are fully integrated. The project also addresses specialized gym equipment coordination, external façade, signage, parking improvements and concludes with testing, commissioning and handover, while maintaining strict health, safety, and environmental compliance and coordination with consultants, suppliers and client representatives.

Oxygen Gym

Location
Al Khawaneej 1, Dubai

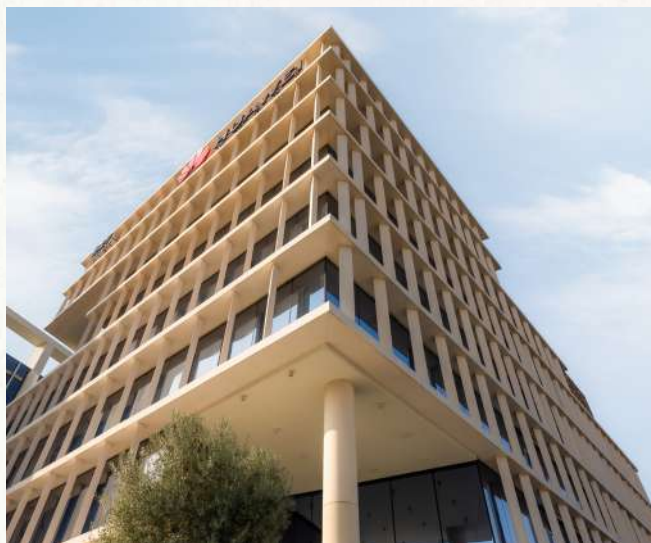

The project encompasses full-scale office construction and fit-out, starting with site preparation, enabling works, structural and concrete construction, blockwork, masonry, roofing and waterproofing. It includes external façades, curtain walls, aluminum, glazing, cladding, interior partitions, ceilings, flooring, wall finishes and high-end joinery and fit-out works. All building systems are covered — mechanical (HVAC), plumbing, electrical, lighting, fire alarm, firefighting, ELV and IT/communication infrastructure — alongside office furniture and workstation installations. External works, landscaping, parking and access roads are delivered as part of the scope, culminating in testing, commissioning and handover, with continuous health, safety, environmental management and coordination with consultants, vendors and client teams.

Huawei Headquarters

Location
Dubai Media City, Dubai

The project encompasses full-scale educational facility construction, including site preparation, earthworks, structural and concrete works, blockwork, masonry, roofing and waterproofing. It covers external façades, cladding, aluminum, glazing, curtain walls, interior partitions, ceilings, flooring, wall finishes, joinery, carpentry, and decorative painting. All building systems are included—HVAC, plumbing, electrical, lighting, fire alarm, firefighting and ELV systems. Classroom and laboratory fit-outs, auditoriums, multipurpose halls, sports facilities, playgrounds and outdoor courts are integrated, alongside external works, landscaping, boundary walls, parking and access roads. The scope concludes with testing, commissioning, handover, health, safety, environmental management and coordination with consultants, suppliers and client representatives.

Arcadia Global School

Location
Al Furjan, Dubai

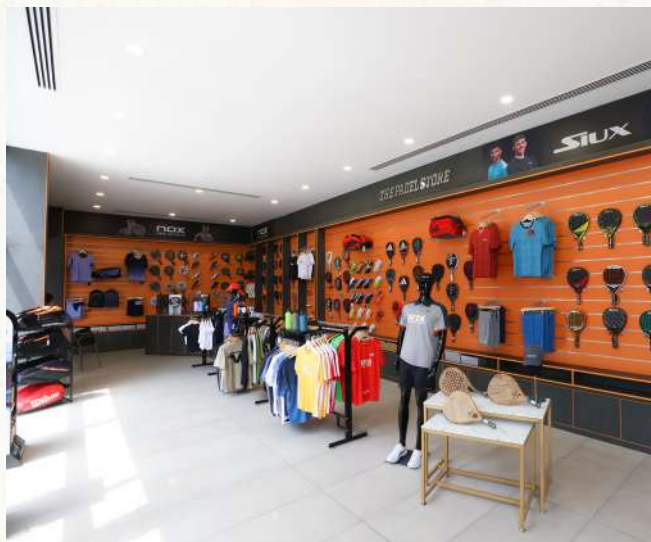

The project encompasses the full-scale facility construction, including site preparation, earthworks, structural and concrete works, blockwork, masonry, roofing and waterproofing. It covers external façades, cladding, aluminum, glazing and metal works, interior partitions, ceilings, flooring, wall finishes, joinery and carpentry installations. All building systems are included — HVAC, plumbing and drainage, electrical and lighting, fire alarm, firefighting and ELV systems. Specialized sports facilities are integrated, including padel courts, surfacing, enclosures, spectator seating, locker rooms, showers, sanitary facilities, café and retail fit-outs. External works, landscaping, parking areas, signage and branding are incorporated, concluding with testing, commissioning, handover, health, safety and environmental management, and coordination with consultants, vendors and client representatives.

World Padel Academy

Location
Dubai & Sharjah

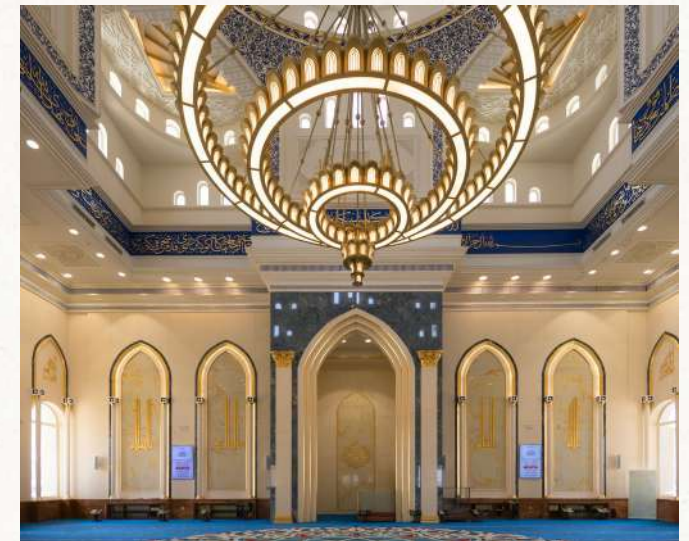

We specialize in renovation and fit-out projects for offices, commercial buildings, villas, shopping malls and institutional spaces, offering turnkey solutions.

Our services combine design proposals, high-quality finishes and attention to detail, ensuring functional and visually appealing spaces.

Services Include:

- Design proposals and conceptual layouts
- Interior partitions, false ceilings and decorative finishes
- Flooring (marble, parquet, carpet, tiles) and wall finishes
- Joinery and furniture fabrication/coordination (FF&E) • Painting, feature walls and specialty decorative treatments
- Electrical, lighting and ELV system installation
- HVAC, plumbing and sanitary upgrades
- Kitchen, café and retail fit-outs
- Reception, lobby and common area renovations
- External painting, façade touch-ups and signage
- Landscaping, interlock and outdoor amenity works
- Testing, commissioning and handover

Renovation & Fitout

The project includes complete interior renovation and fit-out works, starting with site preparation, demolition and internal space reconfiguration. It covers floor, wall and ceiling finishes, marble, granite, decorative stone, high-end joinery, carpentry, gypsum and feature ceilings, painting, wall cladding, glass, aluminum and metal works. Building systems include HVAC, plumbing, electrical, lighting, ELV, fire alarm and firefighting, along with acoustic and insulation works. Office furniture, workstations, signage and branding are coordinated, while external landscaping, hardscaping, interlocks, paving and outdoor features are delivered. The scope concludes with testing, commissioning, handover and full health, safety, environmental management and coordination with consultants, suppliers and client teams.

Abdulla Al Arif Holding

Location
Al Quoz 2, Dubai

The project involves comprehensive interior refurbishment and fit-out, including site preparation, demolition of existing finishes and upgrades to lift lobbies, corridors, reception and common areas. Works cover floor, wall and ceiling finishes, joinery, carpentry, furniture and fixtures and gym fit-out with flooring, mirrors and equipment coordination. Building systems include HVAC modifications, plumbing, electrical and lighting enhancements, ELV, and fire alarm/firefighting adjustments, alongside aluminum, glazing and metal finishing. Decorative and feature lighting, external façade touch-ups, landscaping, and paving/ interlock works are also included. The scope concludes with testing, commissioning, handover and strict health, safety, environmental compliance, with coordination across consultants, suppliers and client teams.

Adamas Building

Location
Dubai Silicon Oasis, Dubai

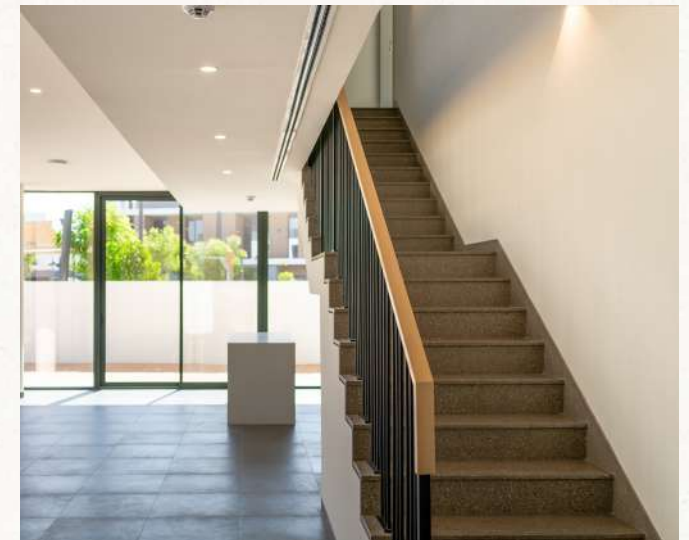

The project encompasses interior fit-out works for villas, including floor, wall and ceiling finishes, decorative painting and feature finishes. Building systems cover electrical, lighting, plumbing, sanitary and HVAC installations. Coordination is provided for kitchens and wardrobes (excluding joinery fabrication) alongside aluminum, glazing and metal works. External works include façade finishing, stone cladding, landscaping, softscape, hardscape, interlock paving, boundary walls, gates, external lighting and signage.

Arabian Ranches 3

Executed Under Naresco Contracting

Location
Wadi Al Safa 5, Dubai

The project encompasses full-scale educational facility construction including site preparation, earthworks, structural and concrete works, blockwork, masonry, roofing and waterproofing. It covers external façades, cladding, aluminum, glazing, curtain walls, interior partitions, ceilings, flooring, wall finishes, joinery, carpentry and decorative painting. All building systems are included—HVAC, plumbing, electrical, lighting, fire alarm, firefighting and ELV systems. Classroom and laboratory fit-outs, auditoriums, multipurpose halls, sports facilities, playgrounds and outdoor courts are integrated, alongside external works, landscaping, boundary walls, parking and access roads. The scope concludes with testing, commissioning, handover, health, safety, environmental management and coordination with consultants, suppliers and client representatives.

Arcadia Global School

Location
Al Furjan, Dubai

The project includes complete interior fit-out and workspace refurbishment, covering carpet and parquet flooring, ceiling works, false ceilings and lighting system installation and upgrades. Glass partitions, aluminum framing, HVAC installation, AC fixing, plumbing, drainage and sanitary works are included along with workstation joinery, office furniture coordination, painting and decorative finishes. Electrical and ELV system adjustments are carried out, with full coordination of FF&E (furniture, fixtures, and equipment). The scope concludes with testing, commissioning and handover, ensuring a fully functional, upgraded and coordinated office environment.

Naresco Contracting

Location
Al Quoz 1, Dubai

The project covers complete interior fit-out works for office spaces and meeting areas including floor, wall and ceiling finishes, gypsum partitions, false ceilings, painting and decorative finishes. Aluminum, glass and metal works are included along with mechanical (HVAC) installations and modifications, plumbing, sanitary works, electrical and lighting systems, ELV systems (data, CCTV, access control, AV) and fire alarm and firefighting systems. Coordination is provided for furniture and fixture installations (FF&E) while external façade touch-ups and signage are also delivered. The scope concludes with testing, commissioning and handover, ensuring fully functional and finished office spaces.

Daytona Real Estate

Location
Al Quoz 1, Dubai

The project includes comprehensive external works, covering paving and interlock installation, landscaping and softscape development. It involves gate barrier installation with access control systems, construction of parking sheds and covered areas, boundary walls and fencing. External lighting installations, site grading and drainage works are also included. The scope concludes with testing, commissioning and handover, ensuring fully functional, secure and well-finished outdoor and access areas.

DSO Mosque

Location
Dubai Silicon Oasis, Dubai

The project covers external finishing works including paving and interlock installation, column cladding, external painting and decorative finishes. It includes installation of benches and site furniture, landscaping and softscape development as well as waterproofing for terraces and exposed areas. The scope also encompasses site finishing, quality inspections and concludes with testing, commissioning and handover, ensuring fully completed, functional and aesthetically refined outdoor spaces.

15 Northside

Location
Business Bay, Dubai

The project includes external painting and surface finishing, installation of building signage, surface preparation and minor repairs. All works are completed with thorough quality inspections and touch-ups, ensuring a fully finished, visually appealing and well-maintained exterior.

Wasl Port Views

Location
Al Mina, Dubai

The project encompasses the construction and installation of pergolas and parking sheds along with external painting and surface finishing. It includes installation of CCTV and security systems, site preparation and minor civil works. The scope concludes with testing, commissioning and handover, ensuring fully functional, secure and well-finished outdoor structures and facilities.

Wasl Hub

Location
Al Quoz 2, Dubai

The project covers landscaping and softscape works, paving and interlock installation, façade lighting and building signage and branding. External painting and decorative finishes are included with the scope concluding in testing, commissioning and handover to ensure fully completed, functional and visually refined outdoor spaces.

Wasl Village

Location
Al Qusais, Dubai

The project covers comprehensive fit-out works, including the gym with flooring, mirrors, wall finishes and equipment integration; Boon Café with counters, flooring, finishes and decorative elements; and the WPA Store with display counters, shelving, and interior finishes. The reception area is upgraded with counters, feature walls, flooring and finishes, while playgrounds and outdoor activity areas receive surfacing and finishes. General interior works include flooring, walls, ceilings, paint, glass partitions, aluminum and metal finishes. Building systems cover electrical, lighting, HVAC, plumbing and sanitary works, with full FF&E coordination. The scope concludes with testing, commissioning and handover.

World Padel Academy

Location
Dubai & Sharjah

The project includes fit-out works for the gym, reception and corridors, covering flooring, wall finishes, mirrors, counters, feature walls, ceiling treatments, painting and decorative finishes. Glass partitions and aluminum framing are installed in the reception and corridors alongside lighting and electrical systems. HVAC and ventilation modifications are carried out as required with full coordination of furniture, fixtures and equipment (FF&E). The scope concludes with testing, commissioning and handover, ensuring fully functional, well-finished and coordinated interior spaces.

Al Zarooni Building

Location
Al Nahda 2, Dubai

We provide comprehensive facilities management solutions, combining soft, hard and support services to ensure safe, efficient, and well-maintained environments across offices, residential complexes, commercial buildings, shopping malls and institutional spaces. Our FM services cover day-to-day operations, preventive maintenance, emergency response as well as handover and defects liability support, delivering turnkey solutions tailored to client needs.

Soft Services:

- **Housekeeping:** Routine and deep cleaning of offices, lobbies, corridors, washrooms and common areas
- **Floor care:** polishing, carpet shampooing, tile/marble maintenance
- **Waste management,** recycling and sustainable disposal
- **Landscaping,** irrigation and exterior cleaning (façades, windows, parking, canopies)
- **Specialist kitchen/food service area cleaning**

Hard/Technical Services:

- **MEP maintenance and repairs,** HVAC servicing, lift/elevator maintenance
- **ELV - Fire alarm, firefighting, electrical, plumbing, drainage and hot water systems**
- **Minor civil and exterior repairs:** painting, tiling, partitions, doors, flooring, façade touch-ups
- **Roof maintenance, exterior waterproofing and building system testing/commissioning**

Facilities Management

Support, Handover & Asset Management:

- Routine inspections, preventive maintenance scheduling and DLP support
- Energy management, monitoring and sustainability initiatives
- Asset tracking, maintenance records and analytics
- Emergency response, 24/7 help desk and third-party coordination
- Building handover support and contractor liaison

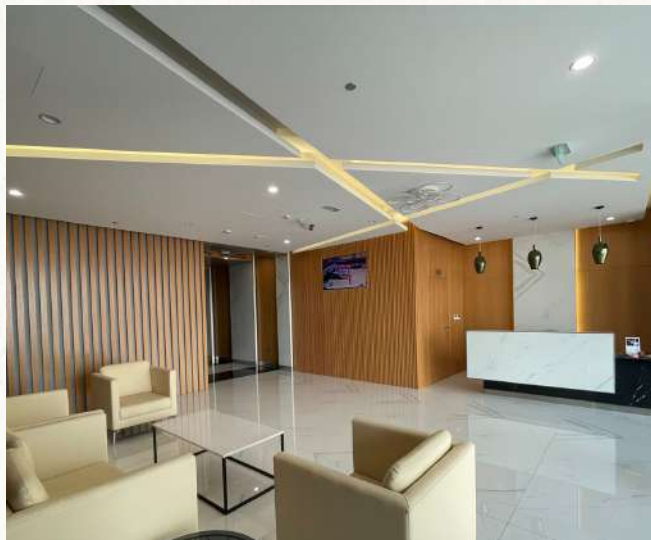

Additional/ Specialized Services:

- High-level façade cleaning, rope access and high-rise maintenance
- Water tank, grease trap and sewer interceptor cleaning
- Pool maintenance and lifeguard services
- Indoor air quality testing, duct cleaning and infrared thermography
- Concierge, front desk, staffing and move-in/move-out support
- Scheduled building fabric maintenance, energy audits and BMS integration

Through Renova 360, we coordinate with our sister companies to deliver specialized solutions that complement our scope of work, with a particular focus on BIANCO Marble & Granite L.L.C, Al Shindagha Wood Industries L.L.C, Hisn Al Fahidi Aluminum L.L.C and Mantis Prestressed Concrete L.L.C.

These companies bring extensive experience and technical expertise in their respective fields, allowing us to provide seamless, high-quality solutions across our projects.

Together with our wider group of sister companies, they contribute specialized knowledge, advanced technologies, and skilled teams, supporting Renova 360's integrated approach and ensuring exceptional project delivery from concept to completion.

Integrated Expertise

Bianco – Marble & Granite: Established in 2006 as part of Abdulla AlArif Holding Group, Bianco is a trusted supplier and installer of natural and artificial stones, including marble, granite, quartz, and other stone finishes for both interior and exterior applications in residential and commercial projects.

Al Shindagha Wood Industries: Founded in 2007, Al Shindagha specializes in high-quality woodworks including kitchen cabinets, wardrobes, and timber doors. Using modern machinery and technology, their experienced team delivers precision-crafted joinery for diverse construction projects.

Hisn Al Fahidi Aluminum: Since 2008, Hisn Al Fahidi has been a leading supplier of architectural aluminum products in the UAE. Their expertise includes curtain walls, structural glazing, spider system facades, doors, windows, skylights, composite claddings, and handrails, offering both fabrication and installation services.

Mantis Prestressed Concrete: Established in 2005, Mantis specializes in prestressed and post-tension concrete works, delivering advanced structural solutions that enhance efficiency and strength. With extensive industry expertise, Mantis delivers durable and efficient solutions.
